Re: Requested Documentation for 780 CMR section 106.5 – Periodic Inspections

The State Building Code (780 CMR), sixth edition. Section 106.5, requires certain facilities to be periodically inspected by the Municipal Building Official, especially certain buildings used as places of assembly, where people sleep (other than single and two family dwellings), where people are not capable of self preservation, and educational facilities. Section 106.5 states in part that *"A building or structure shall not be occupied or continue to be occupied without the posting of a valid certificate of inspection where required by Table 106. A certificate of inspection as herein specified shall not be issued until an inspection is made certifying that the building or structure or parts thereof complies with all the applicable requirements of 780 CMR..."*

Please have the following information available at the time of the inspection (if items are applicable):

1. floor plans of each level of your building (preferable on 8 " x 11" paper)
2. a copy of the latest fire extinguisher inspection report (or invoice)
3. a copy of the latest fire sprinkler test report
4. a copy of the latest fire alarm and smoke/ heat detector test report
5. a copy of the latest "kitchen hood" suppression system test report (if applicable)
6. a copy of the latest generator test report (if applicable)
7. a copy of all other licenses for this building, such as Liquor, Common Victual, Lodging House, DPH (nursing/rest home/hospital), DMR, DMH and/or Office for Children (day care) (if applicable)

Having these documents readily available will reduce the time necessary for the on-site evaluation of your facility.
